

**INSA**  
INDELMA S.A.

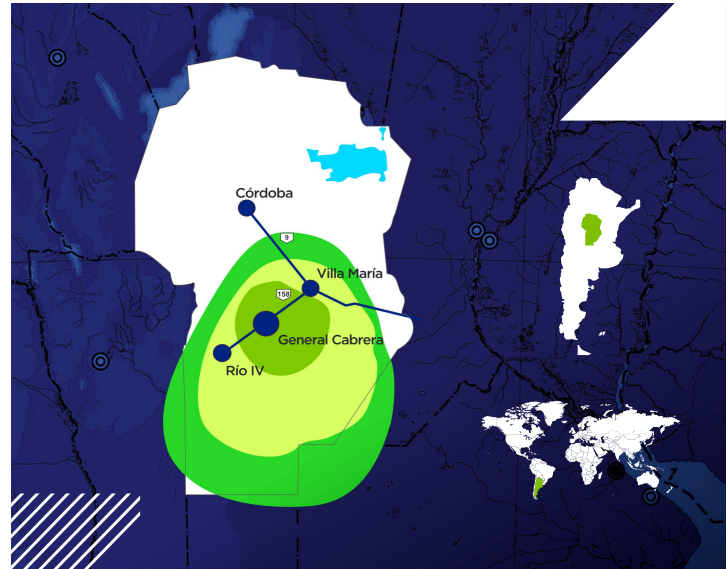

PEANUT

# Geographical **location.**

We are located in the south of the Province of Córdoba, Argentina, in the main peanut production area, where 90% of the national production is obtained.

The process begins during the sowing of peanuts, where the land is selected by professionals who verify the fertility and natural texture of the soil to ensure the production of healthy grains.

# Development **and excellence.**

INSA is an Argentine company that was born as a family business and for more than 50 years it has been dedicated to develop and promote the Argentine peanut industry here and in the world.

Its dynamics of expansion and growth is based on the close relationship with its customers and agricultural producers, on team work and on the permanent technological and professional updating. INSA is a safe and reliable option for the most demanding markets.

INSA's products and production processes are subjected to exhaustive controls required by the application of the BRC food safety standard, which is currently certified.

These controls allow us to meet the quality requirements, trends and preferences of international consumers.

## Quality as a motto.

Traceability  
**from the  
beginning to  
the end.**

# Our **production.**

We have an agricultural production area that exceeds 20,000 hectares between our owned and rented fields; all of them are managed according to the Integral Traceability System that keeps the complete history of each stage:

- Origin and selection of the seeds.
- History of each plot of land and the work carried out.
- Monitoring of the conditions of the harvested product and all industrialization processes.
- Follow-up of the distribution and final localization of the product.

**This makes it possible to reproduce the history of each peanut grain from sowing in the field to its final consumption.**

## Production **processes.**

INSA has a production system of high technology lines for cleaning, shelling, peeling and electronic selection of grains, allowing us to obtain a wide variety of top quality products.

We have conditioning and storage containers for raw material of approximately 28,000 tons and a processing capacity of 200 tons per day of confectionery peanuts suitable for export.

The plant has a refrigerated warehouse of 8,000 tons for finished products that meets the optimal conditions of temperature, humidity and sanitation necessary to store peanuts, maintaining their quality for a longer period.

## Our **varieties.**

**Pampa Jumbo**

Grains per ounce

28/32	30/32	34/38
Inshell 10/12	Split	

**Runner High Oleic**

Grains per ounce

30/36	38/42	40/50
50/60	60/70	80/100

**Virginia High Oleic**

Grains per ounce

24/28	28/32	30/36
Inshell 9/11	Split	

## Sustainable **development.**

INSA is committed to the environmental protection. Its management system includes procedures and processes aimed at minimizing environmental impact and developing sustainable activities.

## Our **products.**

## Our **packaging.**

Polypropylene bag  
25 / 50 kg

Vacuum packaging  
10 / 25 kg

Big Bag  
1.250 kg

Compact pallet  
1.000 kg

Flexi Tank  
22.000 kg
